DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Usuki et al. (USPN 6239771 B1), hereinafter simply Usuki.

2. In regard to claim 1, Usuki teaches An image cut-away/display system comprising: a plurality of image taking means for taking images in continuous view areas; image combining means for combining the images taken by the image taking means to form a single wide-area view image; see col.19 line 65- col.20 line 5; view-point data generating means for generating view point data for each of users; image cut-away means for cutting away images for each user from the single wide-area view image based on the view-point data for each user; and image displaying means for displaying the cut-away images for each user at a view point of each user. See col.20 lines 5-17.

3. In regard to claim 2, Usuki teaches An image cut-away/display system, wherein the image taking means include a plurality of cameras arranged around a reference center. See col.28 lines 14-20.

Art Unit: 2676

4. In regard to claim 3, Usuki teaches An image cut-away/display system, wherein the image displaying means includes a head-mount display by which the images from the image cut-away means and actual views are overlapped with each other. See col.1 lines 10-15.

5. In regard to claim 4, Usuki teaches an image cut-away/display system, wherein the view-point generating means includes a head-motion tracker for tracking motion of a head of each user or an eyeball positional detector for tracking eye movement of each user. See col.1 lines 20-28.
